

schtec Four Head Inline Welding Machine

WDV 724

Four Head Inline Welding Machine

Standard Features

- Computer controlled (PID) heat control system to achieve welding strength within standards.
- Precise movement capability thanks to high precision linear guidance systems.
- Temperature, melting and bonding time that can be defined separately for each profile type.
- Ability to select profiles with a pneumatic revolver with 8 different positions.
- Welding heads can weld independently of each other.
- Each head can move independently for 90° and middle registration welding.
- Welding patterns can be changed quickly and easily.
- Height adjustable and foldable profile support system.
- "H" and "T" welding capability.
- Automatic middle register centering system

Optional

- 3, 4 and 5 welding head options

Technical Specifications

Electricity Value	: 220-440V, 3~ 60 Hz
Min. Welding Size	: 320 mm
Power Consumption	: 9 kW, 25 A
Max. Profile Width	: 125 mm (90° Welding Angle)
Max. Profile Height	: 165 mm
Machine Length	: 5500 mm
Machine Height	: 2100 mm
Machine Width	: 1950 mm
Welding Angle	: 45°, 90° and V
Machine Weight	: 1980 kg
Air Pressure	: 6-8 bar
Air Consumption	: 200 l/min 64
Max. Welding Size	: 4500 mm
